Professional Summary

Results-driven Full Stack Developer with 3+ years of experience in designing, developing, and maintaining scalable web applications, CRM systems, and enterprise integrations. Strong expertise in Angular, PHP (CodeIgniter 4), Node.js, Java, MySQL, and MongoDB. Hands-on experience in third-party CRM integrations, AWS cloud services, S3 bucket storage, Firebase push notifications, real-time messaging, database architecture, and API-driven backend development.

Technical Skills

- **Frontend:** Angular, TypeScript, HTML, CSS, Tailwind, JavaScript
- **Backend:** PHP (CodeIgniter 4), Node.js, Java, REST APIs
- **Database:** MySQL, MongoDB, Database Design, Schema Design, Query Optimization
- **Cloud & Storage:** AWS, S3 Bucket, Firebase
- **Integrations:** Third-party APIs, CRM Integrations, Webhooks, Socket.IO, FCM
- **Tools:** Git, GitHub, MPDF, Postman, VS Code
- **Other:** Real-time Communication, Push Notifications, API Architecture, Performance Optimization

Experience

Software Engineer

LOGICINFEEL, Trivandrum, Kerala

Feb 2023 – Present

- Designed and developed scalable CRM applications using Angular, PHP (CodeIgniter 4), Node.js, MySQL, and MongoDB.
- Architected database schemas and optimized queries for performance.
- Integrated third-party APIs and built automation workflows.
- Developed real-time communication systems using Socket.IO.
- Implemented Firebase Cloud Messaging (FCM) for notifications.
- Designed AWS S3-based file storage solutions.
- Built PDF generation systems using MPDF.
- Designed and optimized REST APIs.
- Contributed to backend architecture and modular design.
- Worked on Java-based backend modules and integrations.
- Led and mentored a team of 2-4 developers, overseeing task allocation, code reviews, and ensuring high-quality feature delivery across projects.

Software Engineer

Bitbridge Technologies, Trivandrum, Kerala

Jul 2022 – Feb 2023

- Developed authentication systems and frontend modules.
- Built responsive UI and integrated REST APIs.
- Collaborated with backend teams for feature delivery.

Key Project Experience

CRM System with Real-Time Communication and Automation

- Developed a full-scale CRM platform supporting customer management, follow-ups, analytics, and workflows.
- Implemented real-time messaging using Socket.IO and Firebase Cloud Messaging (FCM).
- Designed backend architecture and scalable database systems.
- Integrated third-party APIs for automation and reporting.

Vehicle Inspection and Job Card Management System

- Developed and maintained inspection module using Java-based backend architecture.
- Implemented secure shareable link functionality with configurable expiration date and time.

- Designed backend logic for controlled access, ensuring data security and time-bound validation.
- Built APIs to handle inspection workflows, data processing, and reporting.
- Contributed to system design, database structure, and enterprise-level backend integration.

Education

B.Tech in Computer Science Engineering

APJ Abdul Kalam Technological University

2021

Projects

Clinical Data Fusion for Smart Healthcare

- Developed system integrating multiple healthcare data sources.
- Used heatmaps and correlation analysis.
- Applied image processing algorithms.
- Improved diagnostic accuracy using ML techniques.

Certifications

- Java Programming Masterclass – Udemy
- AWS Development Tools and Services – AWS
- Cybersecurity and IoT – Coursera
- Certified Secure Computer User – EC-Council
- Google Analytics for Beginners – Google

Publications
